Trained as a clinical neuropsychologist and CBT psychotherapist, I am an assistant professor at the University of Sussex, where I head the [Reality Bending Lab \(ReBeL\)](http://realitybendinglab.com). We study aspects of reality bending (e.g., illusions, beliefs of reality, neuroscience of deception, fake news, altered states of consciousness), the role of the body and emotions in cognition (e.g., emotion regulation and interoception), and methodology (statistics, programming, and neurophysiological techniques). I am also strongly committed to open science, developing open-source software (e.g., [easystats](https://github.com/DominiqueMakowski/easystats), [NeuroKit](https://github.com/DominiqueMakowski/NeuroKit)) to make advanced methods more accessible.
